Top Enterprise Data Challenges

Data Silos

Data is scattered across disconnected systems and devices in varying formats.

Data Search Gap

Finding data for daily tasks is difficult. Data search results are often out of context.

Limited Data Analysis & Reporting

Data is hard to collect, cumbersome to unify, and tedious to analyse for accurate reporting and analytics.

Inadequate Data Tools

Existing solutions are fragmented and outdated. New integrations are too complex, slow, and costly.

Misguided Visibility & Decisions

Stakeholders struggle to make present or future decisions due to incomplete, unreliable data insights.

Loose Data Access Control

Lack of proper access control, privacy, traceability, and compliance is a constant challenge.

Make Data-Intensive Operations Simple

Intalio Insight: Impact of AI-Driven Data Transformation

Foster a Data-Focused Culture

Bring all your enterprise data together—across systems, documents, emails, social channels, and more—so everyone works with the same insights and drives in the right direction.

Lead with Data Governance

Comply with complex data policies and procedures to ensure maximum privacy, control, transparency, accuracy, security, and long-term regulatory readiness.

Enhance Operational Efficiency

Harness the power of AI, GenAI, and cognitive services to seamlessly move data through its lifecycle—speeding up processes and empowering every stakeholder to work smarter, faster, and more confidently.

Drive Data Search Efficiency

Empower teams with intelligent enterprise search & discovery to surface relevant content, insights, and answers—streamlining tasks, boosting productivity, and making work easier.

Make Data-Driven Decisions

Lay a strong foundation for accurate, actionable, and timely decisions powered by descriptive, diagnostic, predictive, and prescriptive insights and analytics.

Intalio Insight: AI & Cognitive Driven Data Lifecycle Management

AI-Powered Data Collection and Transformation

Data Ingestion: Ingest data from various structured, semi-structured and unstructured data sources.

Data Classification & Metadata Handling: Discover, catalogue & classify data assets. Capture metadata to enable data search.

Business Processes: Use native capabilities to build workflows and integrate with workflow engines to accelerate data and process management.

Data Centralisation: Centralise data storage, management, and access from a single, unified repository.

Data Quality: Conduct data profiling to understand and assess data structure and content with various validation rules to identify and fix issues.

AI Data Processing: Employ NLP, ML, Entity Extraction, AI agents, Sentiment Analysis, OCR, Speech-to-text, and more to streamline data transitions.

Data Pipelines: Use prebuilt or design data transformation workflows with low-code/no-code tools.

Data Governance: Ensure data is managed responsibly in accordance with organisational policies, procedures, & regulatory standards.

Data Security & Personal Data Protection: Implement data access controls, permissions, & encryptions to prevent breaches & comply with data privacy regulations.

A Signature Experience

AI-Powered Data Search & Discovery

Intelligent Search: Intelligently understand natural language, search & find relevant data via semantic, fuzzy matching, & others.

Data Visualisation: Create interactive dashboards and visualisations to explore data and identify trends.

Knowledge Retrieval & Synthesis: Use AI to find relevant data and content. Extract key points for precise, context-aware summaries and recommendation.

Data Storytelling: Transform raw data and analytics into a clear, engaging narratives that help users understand insights and take action.

Data Analytics with AI & NLP Powered Insights

Real-Time Insights: Analyse data from multiple sources in real-time to gain immediate insights and respond to changing conditions.

Advanced Analytics: Use machine learning models for descriptive, diagnostic, predictive, & perspective analytics.

Personalised Dashboards: Create personalised dashboards to track key metrics and performance indicators.

AI & NLP Insights: Ask questions and generate answers, summaries, reports, & insights using AI agents and GenAI.

Why Intalio Insight?

Strong Insight Engine

Applies relevancy methods to discover, analyse, describe and organise content and data.

Intelligent Enterprise Search

Uses NLP, ML & semantics to find data and info based on intent, relevance, behaviour, & context.

Ease-of-Use & Adoption

Multilingual with easy configuration, intuitive navigation with latest UX design principals.

Continuous Updates

Enriched with a roadmap for continuous enhancements in features, usability, and more.

Advanced AI & GenAI

Integrates AI, AI agents, ML, NLP & GenAI techniques to supercharge data flow and performance.

Native Low-Code/No Code

Easily build data pipelines and analytics workflows to accelerate customisations and updates.

Secure & Stable

Uses tight and granular identity and security practices to ensure proper data access and usage.

An Intalio Platform™ Product

Runs on a Microservices-based architecture & easily integrates with Intalio Platform™ products.

Data Governance Focus

Built to comply with complex data policies and procedures to ensure maximum privacy and control.

Ready for Integration

Equipped with universal connectors & API Catalogues to integrate with third-party systems and services.

Flexible Deployment

Can be deployed on-premises, cloud & using a hybrid deployment model as per customer requirements.

Transform Enterprise Data to Strategic Advantage

About Intalio Insight

Intalio Insight is an AI-powered data integration, management, search, and analytics system designed to help enterprises transform data into actionable knowledge. It enables organisations to foster a data-focused culture, enhancing operational efficiency and business visibility with real-time insights and precise analytics.

With low-code/no-code capabilities, an intuitive interface, and advanced GenAI, it automates the entire data lifecycle. Easily configurable, it supports on-premises, cloud, or hybrid deployments and integrates seamlessly with third-party ecosystems.

Intalio Insight is part of the fully integrated Intalio Platform™ suite of products designed to automate, integrate, and control the journey of data, content and processes across the enterprise—enabling customers to build and activate operational intelligence.
