

Empowering corporations

with innovative FinTech & digital transformation solutions.

About us

Jiway is a European software editor serving primarily the financial industry:

- Private Banks
- Family Offices
- Investment Banks
- Tier 2 & Tier 3 Retail Banks
- Insurance companies
- & more

Jiway, founded in 2003 as a public limited company under the laws of the Grand Duchy of Luxembourg, emerged after nearly 10 years of expertise in the Private Banking segment as a spin-off of the Odyssey Group (now acquired by Temenos).

Intalio acquires Jiway, the renowned software editor based in Luxembourg, to expand its presence in the Financial Sector.

jiway

01. OnBoardPro

This module streamlines the onboarding of new clients by offering online self-onboarding, contract creation, & a dynamic, configurable workflow that includes eForms, document uploads, and external service calls. It reduces costs, minimizes errors, & accelerates the onboarding process.

02. Relate360

This module centralizes and archives key events in the business relationship, such as visits, complaints, and meetings, while providing a data room for document storage. It also facilitates faster information exchanges with external users and enables cost-effective access to relationship information.

03. HighQReport

This module enables private banks to deliver high-quality, customized reports to High-Net-Worth clients, providing detailed insights on risk, valuations, and investment performance. It enhances client satisfaction and retention by offering flexible, visually rich reports that can be tailored for each client in various languages.

04. KYC DueDil

This module helps banks comply with regulatory requirements for Know Your Customer (KYC) by offering online self-KYC and auto-mated contract creation for new clients. It minimizes the risk of penalties, ensures compliance, and delivers a quick return on investment through competitive pricing.

05. CorpAction

This module automates the generation of corporate action notice letters in multiple languages, based on corporate events, with options for review and modification before publishing. It simplifies managing both voluntary and mandatory events, reduces processing time, and adds value by allowing additional relevant information to be included in the letters.

06. Contract Master

This module facilitates the rapid creation of contracts for new or existing clients through a fully dynamic and configurable workflow, including e-Forms, questionnaires, document uploads, and external service integrations. It reduces costs, supports multiple languages, ensures compliance by eliminating manual errors, and enables the generation of various contracts from a single process.

07. FlexiForms

This module enables dynamic management and versioning of all bank forms, allowing for the digitalization of documents and the replacement of editable PDFs or physical copies. It reduces the number of templates, minimizes legal and operational risks associated with manual processes, and helps lower costs through streamlined document management.

08. BankConnect

This module provides modern eBanking and mobile banking solutions with high security and seamless integration with core banking systems. It supports reporting and future transaction capabilities, is compatible with both iOS and Android, and addresses security weaknesses in outdated banking technologies.
